

1 Ilustrasi Gambar: Abstrak Grafis (*Graphical Abstract*)/Ringkasan Visual (*Graphical Summary*)

Ketentuan Pembuatan Abstrak Grafis (*Graphical Abstract*)/Ringkasan Visual (*Graphical Summary*):

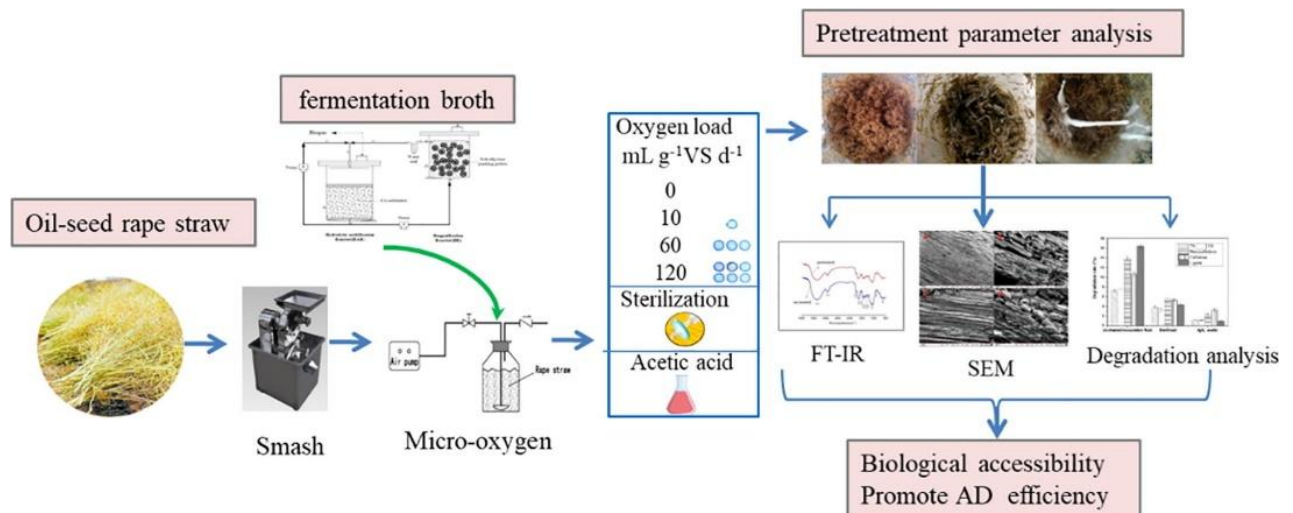

- a. Abstrak grafis/ringkasan visual terdiri atas sebuah gambar yang secara visual merangkum temuan utama dari tugas akhir.
- b. Abstrak grafis/ringkasan visual disusun secara singkat dan berdiri sendiri, menyampaikan tujuan dan hasil penelitian, serta disajikan dengan cara yang menarik secara visual dengan resolusi gambar minimal 300 dpi.
- c. Utamakan penggunaan ilustrasi gambar hasil tugas akhir, meliputi foto hasil penelitian, grafik, diagram, histogram, sketsa, dan sebagainya.
- d. Jika mengambil elemen atau foto di luar hasil tugas akhir, perhatikan penggunaan elemen berhak cipta, serta pastikan hanya menggunakan elemen yang bersifat bebas pakai, memiliki izin, atau mencantumkan atribusi yang sesuai apabila diperlukan.
- e. Mahasiswa wajib mendeklarasikan penggunaan AI di halaman pernyataan mengenai tugas akhir, sumber informasi, penggunaan AI, dan pelimpahan hak cipta, jika digunakan dalam pembuatan abstrak grafis/ringkasan visual.
- f. Abstrak grafis (*graphical abstract*)/ringkasan visual (*graphical summary*) ditulis dalam satu halaman.
- g. Judul diletakkan di bawah abstrak grafis/ringkasan visual, maksimal 6 kata tidak termasuk kata depan dan kata hubung.

Seismic reliability evaluation of interdependent water and power supply networks (WPSNs)

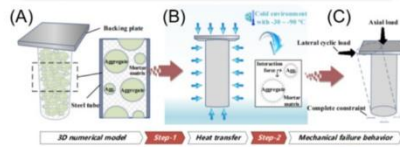

Conclusion: Water and power supply networks (WPSNs) can form both one-way and two-way dependency relationships. The proposed method can effectively evaluate the seismic reliability of WPSNs with interdependencies. Increasing the number of parent nodes in a parent network improves the seismic reliability of the child network. Considering two-way dependencies further decreases the reliability of both networks, and significantly alters the spatial distribution of network reliability.
